setcom appointment reflects growing presence in North American market

setcom, a premier supplier of test tools and technologies to the wireless industry, has appointed Robert Johnson as Vice President, Sales for North America. This development is part of setcom's drive to improve access to its products and services to customers in these important markets.

"I am delighted to welcome Rob to our team" comments Peter Lund, President Worldwide Sales. "With setcom going from strength to strength on a global basis, we are committed to the close relationships and market leading support which our customers have come to expect from us. Rob and his team will ensure this continues to happen for all our existing and new customers in North America."

Mr. Johnson joined setcom in July 2005 with more than 20 years of experience in engineering and sales management for leading U.S. wireless telecommunications and electronics companies. He most recently served as vice president of North America Operations for Anite Telecoms, Inc. a UK-based supplier of cellular conformance test technology. Prior to Anite Telecoms, Johnson served as the director of new business development for Siemens Corporation's Information and Communication Networks Division. His professional background also includes 12 years of senior sales management experience with Tektronix Inc., a Fortune 500 manufacturer of test and measurement equipment for the telecommunications industry.

"I am very excited about setcom's direction and strategy for continued growth." said Robert. "My appointment reaffirms setcom's conviction to close customer relationship and delivering beyond expectation. setcom's focus is sharp and their dedication to the customer is unsurpassed."

setcom wireless products and services:

setcom develops cutting-edge technologies for test solutions that can be applied not only in conformance testing, but also product development. Therefore, setcom significantly helps shortening customer's development cycle and time-to-market.
