PRESS RELEASE

Sliema, Malta, 8th November 2007

Daniel Quant joins setcom as Strategic Product Marketing Manager

setcom wireless products have just announced that Daniel Quant is joining the setcom business development team as their new strategic product marketing manager.

Mr. Quant's global product management experience in the wireless telecoms industry and consistent track record of leading new product development and exceeding expectations were the major factors that encouraged setcom to hire him.

The new appointment is the result of the steady growth that setcom have undergone over the past few months. Markku Niiranen, setcom's managing director commented: "These are great times for setcom. We've made unrivalled progress in the wireless testing technology sphere and the S-CAT, our multi-media application test platform is clearly the market leader. I'm sure that Daniel's input will be a great asset to the company's strategic long term growth and evolving product development."

Daniel Quant, a BEng. Honours graduate from the University of East Anglia in the UK has worked in the telecoms industry for 15+ years with companies such as British Telecom, Fujitsu and Racal. A well known face at many of the wireless Industry meetings such as 3GPP, OMA and certification forum meetings, Daniel brings a strong background in the wireless test and measurement industry with the experience to identify new opportunities and the ability to help bring to market an ever compelling range of products to the setcom portfolio.

About setcom (www.setcom.eu)

setcom, whose roots go back to 1989 in Munich, Germany, is an independent technology supplier of test solutions for the digital wireless communications industry. These test solutions address signalling protocol testing for GSM, GPRS, EDGE and UMA/GAN devices as well as testing of mobile terminal applications such as MMS (multimedia message service), PoC (push to talk over cellular), email, Java and Video Telephony. The company's goal is to help reduce its customer's development cost and shorten their time to market.
